

S-GLOBAL MINING

Treasure In Virtual Mining

The World's First Space Mining On Virtual Metaverse

The metaverse is a concept of a persistent, online, 3D universe that combines multiple different virtual spaces. You can think of it as a future iteration of the internet. The metaverse will allow users to work, meet, game, and socialize together in these 3D spaces. In the same manner
SGLOBAL Mining Platform Generated

**NOW ENJOY MINING IN THE METAVERSE WITHOUT THE HASSLE OF HOLDING,
RUNNING, MAINTAINING MINING MACHINES IN THE PHYSICAL WORLD**

A cryptocurrency produced & distributed based on a autonomous mining system that is built using powerful NFT, Smart Contract & metaverse decentralized technologies.

Introducing Space Mining On Virtual Metaverse

A cryptocurrency produced & distributed based on a autonomous mining system that is built using powerful NFT, Smart Contract & metaverse decentralized technologies.

USUAL USER COMPLAINTS WITH PHYSICAL MINING MACHINES

- High machine cost
- High maintenance cost
- No control over your machines in mining farms
- Cannot verify actual machines with cloud mining platforms
- Miner Down-time loss
- Repair & maintenance cost

“ We are replacing physical miners with a new class of virtual mining machines built utilizing ANFT technology. ”

SGLOBAL MINER VS. OTHER MINERS

SGLOBAL New Metaverse World,

Existence of MINER PRODUCTION in Centra Metaverse

The 5 types of Miners produce daily equal or more than 1%
Its always based on META HASH POWE and Equalling to
MINING MACHINE. It should continues upto 40 years and the
token generating 21 Millions. The machine / Miner Production
will be stopped

01

MINER-1 20 META HASH
Production of SGL Tokens : 1% P/24hr

02

MINER-2 100 META HASH
Production of SGL Tokens : 1.05% P/24hr

03

MINER-3 500 META HASH
Production of SGL Tokens : 1.1% P/24hr

04

MINER-4 1000 META HASH
Production of SGL Tokens : 1.15% P/24hr

04

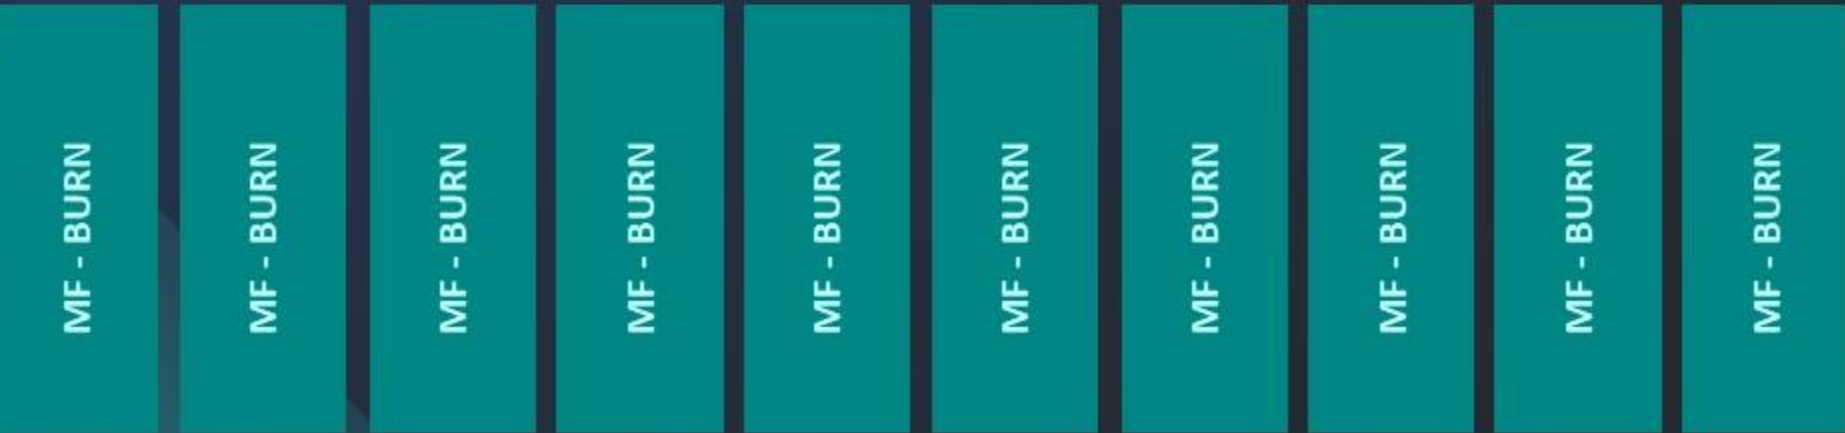

MINER-5 2500 META HASH
Production of SGL Tokens : 1.25% P/24hr

What is ANFT?

Algorithmic Non Fungible Token

ANFT's are simply NFT that have programming or business logic coded into them by default. Regular NFT's have only images and files attached whereas ANFT has a smart contract with business logic attached to it.

Algorithmic NFT

SGLOBAL ANFT Mining Logic

Algorithmic NFT

- Meta Fuel 50%
- Cost of mining
- Max Claims 10
- Limited Claims
- Claim Tax 5%
- Depreciation on each claim
- Warehouse cost 1%
- Metaverse Hosting fee
